2014...present

- various dig-agency mainly NDA
- legacy upgrades
- Magento eCommerce

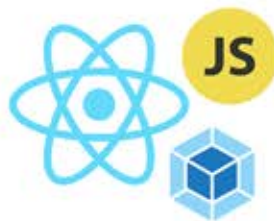

pre-2014.

- Majestic Wine | Naked Wines
- Magento eCommerce
- full stack b/e and f/e

PROFILE

I am a very experienced PHP / Javascript #dev who delivers clean, robust and maintainable code. I work primarily as a collaborative remote team member or as a lead dev on large complex data systems and as a React JS front-end man for a modern and crisp UI. I am the lead dev for the vShop eCommerce platform.

FRONT END

For pure front end I use React JS

- latest ES6/JSX Babel and Webpack 4.x
- routing, redirection, state, properties, Redux
- extensive use of NPM and I am also a contributor
- expert use of promises/callbacks/API usage
- test/behaviour-driven development
- responsive CSS prefer Zurb Foundation

For a full React showcase please visit react.vadoo.co.uk and the code can be found at my public repo bitbucket.org/houseofdavison/reactjs.

Other key front end skills:

jQuery, Mapbox, charting, material design. For PHP based systems, e.g. backend-dashboards, CMS, CRMs etc expert in view-based Apps with blade, extensive use of AJAX with jQuery for a SPA look and feel. I am also happy to collaborate on any React Native projects.

BACK END

Laravel 7/8.x is my first choice back end framework and MVC solution.

With over 10+ years of PHP development and an early Laravel adopter, my knowledge and experience in this field is extensive.

For a full Laravel API/Dashboard demo visit vshop.vadoo.co.uk and the code can be found at my public repo bitbucket.org/houseofdavison/vshop.

Key back end skills:

Expert relational DB design with complex Schemas/joins/EAV. Advanced Laravel techniques inc dependency injection, jobs, queues, error management, email, payments, content management and much more. Adaptive CORS compliant RESTful APIs for your front end or integrated laravel views for an all in one solution.
